

Radio PSA Transcript:

This is Sway Calloway from MTV News. And I'm asking you to listen up.

April is National STD Awareness Month. Why should you care? Because one in two people having sex will get an STD by the age of 25. And most won't even know it.

All STDs are treatable, and many are curable. The only way to know your status is to Get Yourself Tested.

Testing is fast, easy, and painless. To find your nearest STD testing center text your ZIP code to GYTNOW (498669) or visit GYTNOW.org.
